

One idea. Four conversations.

CHANNEL / FORMAT	AUDIENCE / GOAL	MESSAGE	NEXT STEP	ADAPTATION
LinkedIn 4:5 product video + a located finding	Technical asset teams Generate relevant inspection enquiries	Before the next façade repair brief, check the evidence behind it.	Request an inspection proposal	Professional conversation
Sales email Short email + relevant one-page brief	Owner's technical director Open a building-specific conversation	What evidence will support the next maintenance scope?	Share the building, concern and timing	Building-specific enquiry
Reels / Shorts 34-second vertical product sequence	Property and hotel maintenance teams Make the inspection workflow understandable	One building. A closer look. A clearer next step.	Request an inspection proposal	Short visual demonstration
Investor communication Product film + executive paragraph	Potential investors Explain the product's commercial application	Inspection imagery can support an ongoing maintenance workflow.	Discuss verified customer adoption and delivery economics	Application and commercial validation

Proposed copy

LINKEDIN

Planning façade works? Start with the evidence behind the scope. Inspekt AI helps your team locate findings, review inspection imagery and compare previous records where available. Tell us about the building and the decision you are preparing. #BuildingMaintenance #PropTech

REELS / SHORTS

A façade image is the beginning. Locate the finding. Review the record. Discuss the next step with your technical team. Start with your building.

SALES EMAIL

Hello, are you preparing façade maintenance works for a property in your portfolio? Inspekt AI combines drone imagery, AI-assisted analysis and specialist review to support the assessment of façade findings. If useful, share the building location, your main concern and the intended timing so the team can discuss an inspection proposal.

INVESTOR COMMUNICATION

Inspekt AI combines drone imagery and AI-assisted analysis with a platform for reviewing building findings. Its application is practical: help property teams connect inspection records with maintenance planning. Customer adoption, margins, repeat business and the operating model require a separate discussion using verified company data.
