

Façade inspections. Clearer decisions.

Understand your façade before you
plan the repairs.
Inspection evidence for technical
asset teams.

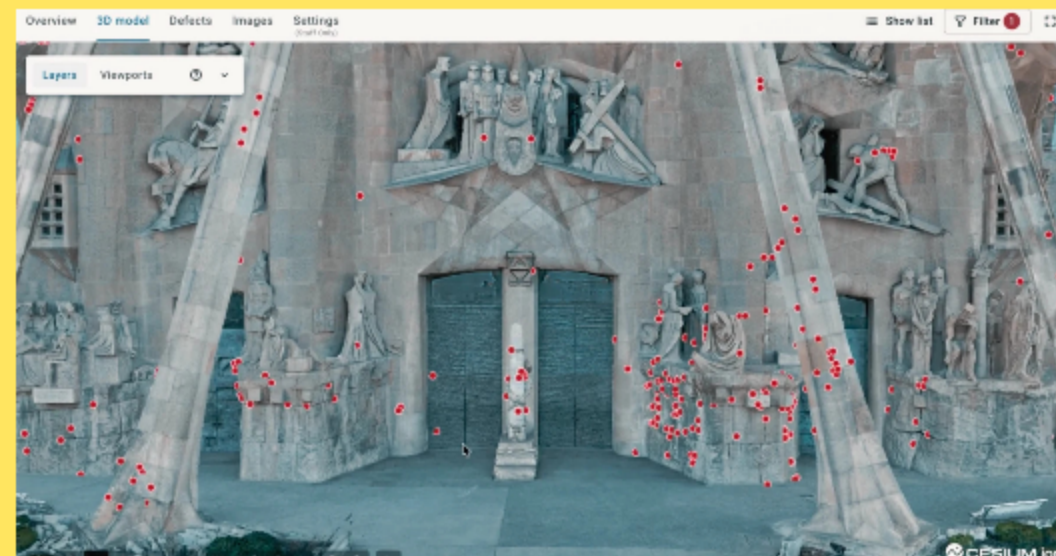

Define the work with better evidence.

Where is the finding?
What needs closer assessment?
What information supports the maintenance
scope?

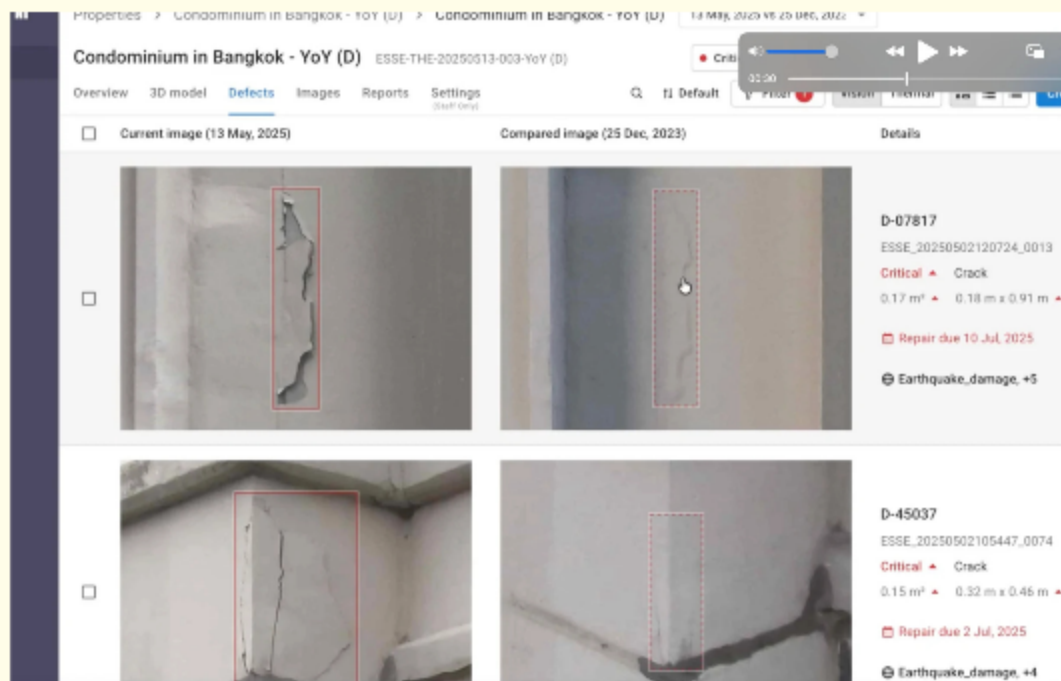

Capture. Locate. Review together.

- 01 Drone imagery provides the visual record.
- 02 AI-assisted analysis organises findings.
- 03 Specialist review supports interpretation.

Give each finding its building context.

Open the image behind a finding.

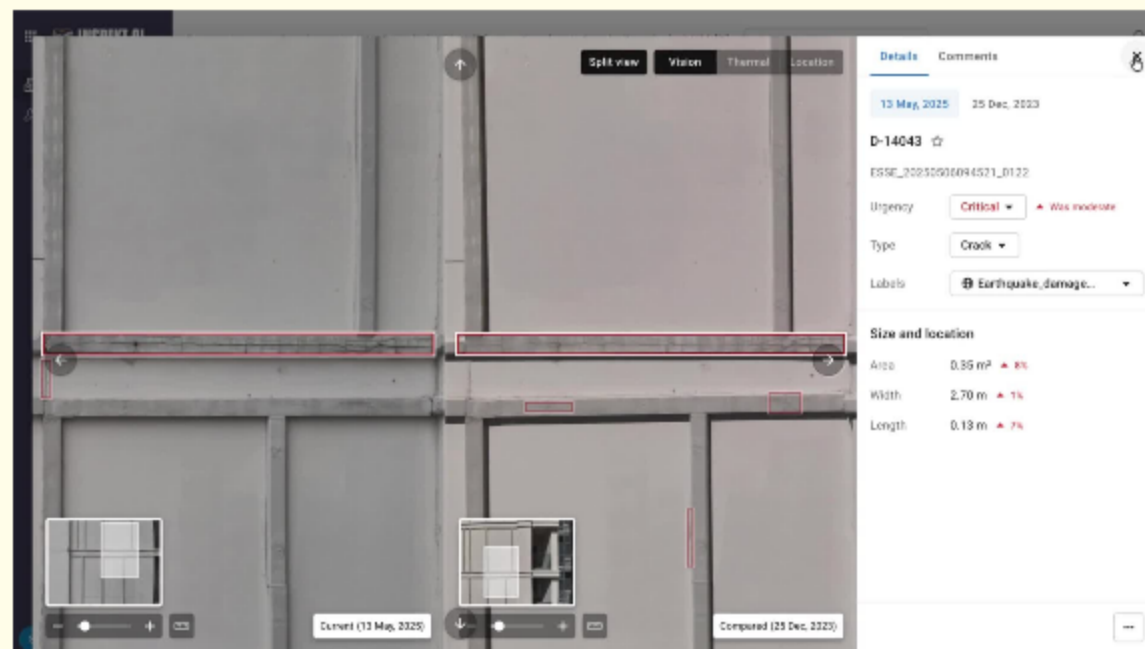

Review its location and recorded details.

Bring the same evidence into the technical discussion.

See what changes over time.

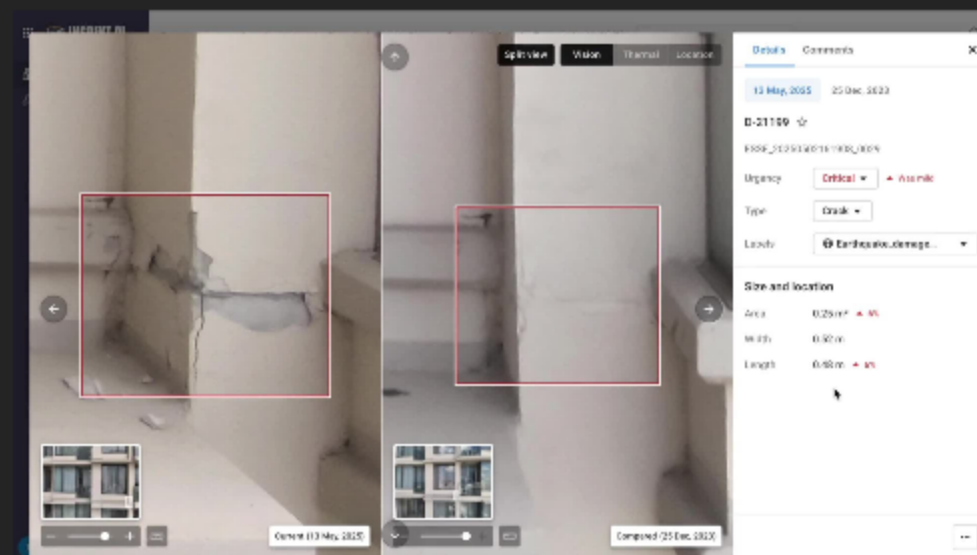

25 Dec 2023 / 13 May 2025

Compare dated images of the same area.
A first inspection can establish the starting record.

Prepare priorities your team can explain.

Use located findings and inspection records to discuss maintenance scope.
Agree what needs further assessment with the responsible technical team.

Start with your building.

Request an inspection proposal.
Share the location, main concern and desired
timing.
Scope and access requirements are reviewed
for each property.
